### Icon Guidelines:

- Use 24x24 or 48x48 px icon sizes. Never scale to odd pixel values.
- Maintain 2px stroke weight. Filled icons for primary actions; outline for secondary.
- Icons must always meet 4.5:1 contrast ratio against their background.
- Use brand color icons on neutral backgrounds; white icons on brand-colored surfaces.

# Brand Voice & Usage

How we speak, where we place the brand, and what to avoid.

## BRAND VOICE ATTRIBUTES

### Inspiring

We lift ideas. We speak with optimism and possibility, never cynicism.

### Clear

Plain language first. We cut jargon without losing depth.

### Warm

We treat every user like a trusted collaborator, not a number.

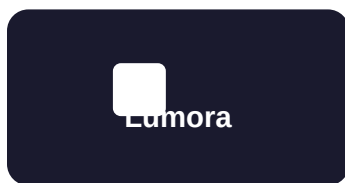

### Confident

We own our point of view while remaining open to dialogue.

## LOGO USAGE

On White

On Dark

On Primary

On Tint

## DO'S & DON'TS

### DO

- Use brand colors as defined with exact hex values.
- Maintain clear space around the logo (min 16px).
- Use approved typefaces only.
- Ensure accessible color contrast (4.5:1 AA).
- Resize icons proportionally.
- Follow photography style guidelines.

### DON'T

- Stretch, skew, or rotate the logo.
- Use unapproved colors or gradients.
- Place the logo on busy backgrounds.
- Use low-resolution images below 72 DPI.
- Mix typeface families inconsistently.
- Change the brand voice to be sarcastic or negative.
